PROFESSIONAL SUMMARY

QA Engineer specializing in test automation, manual quality assurance, and AI/LLM testing for enterprise mobile and web applications. Experienced in delivering end-to-end quality assurance across Fortune 500 digital workplace products, including test strategy development, API validation, regression automation, and Agile release management. Actively seeking a Senior QA Engineer role in the Netherlands.

WORK EXPERIENCE

QA Engineer | Folio3 – CXAI (CXApp)
Dec 2025 – Present · Karachi, Pakistan

- Led end-to-end quality assurance for CXAI — an AI-powered enterprise Employee Experience platform trusted by Fortune 500 companies including PepsiCo, Lenovo, Fox, and NBC Universal — covering Desk/Room Booking, Office Mapping, Internal Communications, and Amenities modules
- Developed and maintained 100+ test automation scripts using Selenium and Playwright, reducing regression cycle time by 24 hours
- Designed and executed test strategy covering functional, regression, smoke, sanity, and exploratory testing across iOS and Android mobile applications
- Conducted API testing using Postman and Swagger to validate platform integrations and ensure data integrity
- Executed AI/LLM and agentic workflow testing for CXAI 2.0, including webhook validation and automated smoke tests
- Logged and tracked 100+ defects in Jira with detailed reproduction steps, severity classification, and root cause analysis
- Authored QA documentation on Confluence including test plans, test cases, edge case coverage, and platform specifications
- Collaborated in CI/CD-aligned Agile sprints — sprint planning, daily stand-ups, retrospectives, and release readiness sign-off

QA Automation Engineer | Mailmunch
Oct 2025 – Nov 2025 · Karachi, Pakistan

- Executed smoke, sanity, and regression test suites to support product releases for a SaaS email marketing platform
- Performed mobile and web application testing; managed release cycles and defect tracking in Jira
- Participated in Agile ceremonies and maintained Git-based version control for test scripts

QA Engineer | Advertising Specialty Institute (ASI)
Sep 2024 – Oct 2025 · Karachi, Pakistan

- Performed API testing and validation using Postman and Swagger across multiple web application releases
- Managed regression cycles and maintained test documentation in Jira to support release management
- Collaborated in cross-functional Agile teams to deliver quality releases within sprint timelines
- Executed smoke and sanity test suites across mobile and web applications for release readiness

Junior QA Engineer | Stixor Technologies
Oct 2023 – Apr 2025 · Karachi, Pakistan

- Built and maintained reusable Cypress test automation scripts for regression testing of web and mobile applications
- Reported and tracked defects in Jira and Azure Boards with detailed reproduction steps and severity classification
- Partnered with developers and designers to resolve defects and improve overall product quality
- Gained hands-on experience with Git, Postman, JMeter, OWASP ZAP, TOSCA, and TestComplete
- Applied Agile and Scrum practices in QA planning, sprint reviews, and retrospectives

QA Intern | Coderatory
Aug 2023 – Oct 2023 · Karachi, Pakistan

- Executed manual test cases and logged reproducible bug reports with accurate severity and priority levels

- Used TestWorthy and TestRail for test case management and tracking
- Contributed to test plans, quality assurance reports, and documentation under senior QA mentorship

TECHNICAL SKILLS

Test Automation: Selenium, Playwright, Cypress, TOSCA, TestComplete
Testing Types: Functional, Regression, Smoke, Sanity, Exploratory, API Testing, Mobile Testing, AI/LLM Testing
API Testing: Postman, Swagger, REST API Validation
Defect & Test Management: Jira, Azure Boards, TestWorthy, TestRail, Confluence
Performance & Security: JMeter, OWASP ZAP
DevOps & Version Control: Git, GitHub, CI/CD pipelines
Platforms: Mobile Apps (iOS/Android), Web Applications, SaaS, AI/LLM Platforms, Enterprise Workplace Software
Methodologies: Agile, Scrum, Test Strategy, Test Planning, Release Management, Quality Assurance

SOFT SKILLS

Communication: Clear defect reporting, stakeholder updates, cross-functional collaboration
Problem Solving: Root cause analysis, edge case identification, critical thinking under pressure
Ownership: Self-directed QA delivery with minimal supervision across multiple product areas
Adaptability: Comfortable switching between manual, automation, and AI testing workflows
Attention to Detail: Thorough test coverage, precise documentation, zero-defect release mindset
Team Collaboration: Agile teamwork with developers, designers, product managers, and senior stakeholders

VOLUNTARY WORK & SIDE PROJECTS

QA Contributor | Open Source & Internal Tools

- Built and maintained an internal F3 QA Agent automation framework at Folio3, contributing to AI-assisted test generation workflows
- Developed structured test case libraries and CSV test suites from Figma designs for two products: Mutual of Omaha Kiosk App and CXAI 2.0 Web App

Fantasy League Dashboard Developer | FIFA 2026 Side Project

- Designing and building a live web dashboard for a 35-participant FIFA 2026 Fantasy League — covering real-time standings, player stats, and match results
- Applying QA principles to validate live data integrations and ensure dashboard accuracy

CERTIFICATIONS

- Jira Fundamentals – Atlassian University
- Software Quality Assurance Silver Certificate – TestDome
